Dataset health report

D:\STUDY\8th sem\project\ML Studio\examples\beginner-explorer-regression\synthetic-pastel.csv

Dataset version: 0

Health indicator: 99.69/100. Mean of completeness (99.39%) and exact-row uniqueness (100.00%). This is not a measure of predictive accuracy or validity.

id	title	severity	status	columns	count	method	explanation	recommendation	risk	evidence
1	Missing values	Medium	Confirmed Issue	[measurement]	6	isna	2.4% of this column is missing.	Review median or most-frequent imputation inside the training pipeline.	No imputation strategy suits every dataset; whole-data imputation can leak validation information.	[3, 4, 5, 6, 7, 8]
2	Potential outliers	Low	Potential Issue	[measurement]	2	1.5 × IQR fences	Extreme observations are not necessarily errors.	Review a box plot and original records.	Deleting extremes can bias the data.	[7.913862, 7.517474]
3	Surrounding whitespace	Low	Confirmed Issue	[category]	49	Compare stripped labels	Whitespace can split equivalent labels.	Preview trimming whitespace.	Whitespace can occasionally be meaningful.	[Group A, Group A, Group A, Group A, Group A, Group A, Group A]
4	Equivalent category labels	Low	Potential Issue	[category]	245	Case-folded and trimmed distinct counts	Some labels differ only in case or whitespace.	Review labels before standardizing.	Case can carry domain meaning.	[]
